

Oncam Takes Control of Grandeye

Written by Bob Snyder
30 July 2012

As Oncam Global takes full ownership of Grandeye, the combined company will now be known as **Oncam Grandeye**.

Oncam Global acquired the remaining 51% of shares from Creative Technology to take full control of the imaging technology specialist because Grandeye has developed smart camera technology that greatly reduces system complexity and cost when compared with other approaches. Grandeye holds a very strong patent portfolio that is equally attractive.

Grandeye will now be fully integrated as Oncam Global's technology and engineering arm, providing a suite of 360-degree technology for security and liability protection applications.

Oncam Global Group was founded in 2007 and is headquartered in Switzerland with regional offices in, the UK, US, Turkey, Iraq and the Middle East. The cornerstone of the Oncam security solution is a process that enables video surveillance, acquisition, tracking and interrogation of suspicious behaviour enabling the verification of a potential threat. This in-turn provides the necessary intelligence needed to make a measured response to any critical situation.
