

Free Video Surveillance Design Tool

Written by Roger Douglas
26 May 2014

From **Smartvue** , the American cloud surveillance platform comes an offer hard to refuse...

Using their free tool, you can... upload a picture of your floor plan, drag and drop cameras into your proposed position, and design your own surveillance maps.

This free online tool allows you to create and save endless maps. This is just one of a number of cloud tools provided by Smartvue in their effort to make cloud video surveillance "elegantly simple."

Starting in 1998, Smartvue is an enterprise cloud software company and video surveillance innovator with more than 20 patents and significant industry awards for its unique products and services. The company delivers end to end surveillance solutions which combine cost effective edge devices with cloud storage and video management services.

Their instructions on how to get this online tool:

1. Visit <http://cloudvue.com/mapper>
2. Create a free account, by clicking on "Sign Up"
