

## SCC Gets One Point Mobile Voice, Data Capabilities

Written by Marco Attard  
18 December 2015

---

SCC adds mobile voice and data capabilities to its Cloud Delivered Managed Services (CDMS) proposition through the acquisition of a controlling stake in One Point.

The financial details of the deal are not available.

One Point unifies best-in-class technologies to simplify the delivery of mobile voice and data services. It will continue operating as normal post-"strategic partnership," retaining the brand and existing leadership team.

"We've been actively pursuing an investment in mobile – and in One Point we've found the right business to complement our existing services portfolio and deliver the same, excellent levels of service to customers," SCC says. "We've worked tremendously hard to build a formidable SDMS proposition-- and position SCC at the cutting edge of IT service delivery."
