---

Nvidia partner PNY Technologies and server platform maker TYAN reach a strategic EMEA distribution deal, with PNY handing distribution of TYAN products across the region.

TYAN makes Nvidia Tesla GPU-based High Performance Computing (HPC) servers designed for applications such as seismic processing, biochemistry simulations, weather and climate modeling, signal processing, computational finance, CAE, CFD, and data analysis.

PNY is the exclusive add-in card partner of Nvidia Quadro workstation graphics solutions, dealing with integrators, distributors and VARs in EMEA and the USA.
