

SkySwitch and Adaptive Networks Join Forces

Written by Alice Marshall
13 September 2019

Channel-exclusive white label Unified Communications as a Service (UCaaS) provider SkySwitch announces a "strategic relationship" with Adaptiv Networks, creator of software-defined wide-area networks (SD-WANs) for business-critical application traffic.

According to the two companies, the team-up will bring best-in-class agile cloud connectivity to customers of the SkySwitch reseller community.

"SkySwitch strives to bring best-in-class solutions to our resellers," the company says. "With the demand for software-defined network services on the rise, SkySwitch has made the strategic decision to align with a company that leads the market. Adaptiv Networks stands out with powerful, frictionless cloud connectivity services. We couldn't be more excited to unite on upcoming projects for our SkySwitch reseller community than we are to be working with Adaptiv Networks."

Founded in 2002, Adaptive Networks offers Network-as-a-Service solutions exclusively through the channel. Over 200 customers use the Adaptive Networks software-defined networks get secure, lower-cost and more reliable cloud networks for voice, data and video communications needs. Meanwhile SkySwitch offers white label services to a range of channel players, including MSPs, agents, ISPs, VARs and wireless internet service providers (WISPs).
