Support From Desktop or Mobile

Written by Marco Attard

25 March 2011

RealVNC announces the latest versions of its VNC Enterprise Edition (an enterprise-class, cross-platform VNC solution)and VNC Viewer Plus.

VNC Enterprise edition supports the widest OS range yet-- with version 4.6 adding support for Windows 7 SP1, SUSE Linux 10-11, Fedora 11-13, Ubuntu 10.04 and 10.10. It also offers increased end-to-end connection security (via 256-bit AES encryption), an improved UI and multiple file/folder transfer abilities.

Meanwhile VNC Viewer Plus 1.2 connects to a VNC Server embedded directly to supported computers carying Intel Core vPro technology, providing built-in remote access. Version 1.2 adds support for Intel Fast Call For Help, allowing remote management of Intel vPro-based clients outside the corporate network.

VNC Viewer is now also available as an Android or iOS app-- allowing users to access their desktops via mobile or tablet device. The app offers trackpad-style mouse alongside familiar touch/tap/drag gestures for remote PC control.
