

Evolve IP launches its **unified communications solution for Android mobile devices** on the Google Play store.

The application can be found with searches for "Evolve IP" and for **UC-One**. Using the application, customers subscribed to the UC-One application on Evolve IP's Broadsoft IP Phone platform have immediate access to the following integrated features:

- Video & and softphone calling using both Wi-Fi and cellular networks - extend your business line features to your mobile device
- Secure instant messaging & group chats
- Phone presence within your business network
- Microsoft Outlook integration
- Easy access call flow settings, corporate directory, and call history
- One-click multi-party conference bridge meeting access, set-up and invitations

Tim Allen, Chief Sales Officer for Evolve IP, says, "Today, there is simply no need for organizations to be out of communication at any time. With Evolve IP's UC-one mobile app all associates are present and available, and able to provide the input needed to the right people at the right time. In addition to Android availability we expect the service to be available for Apple users in the coming weeks."
