

TeamMate Intros WorksZone Compact

Written by Marco Attard
23 October 2015

The WorksZone Compact is a smaller version of the TeamMate WorksZone Collaboration Tables ideal for flexible learning environments or meeting spaces with limited space.

Available with either fixed or adjustable height, it has a Central Connectivity Module allowing users to customise connectivity inputs, from power to the latest wired and wireless collaboration technology from the likes of Extron, AMX and Crestron.

Worktop length options of 1600×1000, 1800×1000 or 2000×1000mm allow the seating of 3, 5 or 6 people. One can position the Screen Support on the side or end of the table adapting to the use in question. The table is also fully mobile, and can be used in conjunction with wall hung screens or adaptable WorksZone screen support.

Optional "Varihite" electronic height adjustment adapts to different meeting styles and applications, be it sitting and collaboration one minute or a quick stand up meeting in the next.
