Christie Brio is now compatible with Apple iOS 9 and OS X El Capitan offering **AirPlay Mirroring**

enabling people to wirelessly present, share and interact with each other using multiple devices and platforms – within the same room or across multiple locations in real-time..

"When Apple launched iOS 9, we started working on updates to our Christie Brio software to make it compatible with the new operating system while adding more features such as support for Windows 10. We're happy that Apple devices running iOS 9 and OS X El Capitan can now use AirPlay to connect to Christie Brio," says Curtis Lingard, product manager, Christie.

The Christie Brio family currently has three members:

Christie Brio Enterprise – Integrates smoothly into a local area network for access to internet and network services so you can collaborate securely and share high-quality content between multiple locations. Any content from devices connected to Brio Enterprise units can be shared across all the displays in the same collaboration session. Regardless of participants' geographic locations, everyone sees the same information at the same time.

Christie Brio Team+ – Offers the advantage of displaying original video content at native resolutions through wired video inputs. The Team+ unit has an integrated wireless access point

(WAP), supporting output sources of up to 2560 x 1600 at 30Hz or 1920 x 1080 at 60Hz with HDCP.

Christie Brio Team – Fully self-contained and does not require access to the local area network. Individuals can quickly connect to the Brio Team unit and wirelessly share information with others in the same room. Featuring integrated wi-fi, AirPlay and WiDi receivers, Brio Team requires no additional drivers nor external dongles.
