

Altinex Debuts TNP327, TNP327C Interconnect Boxes

Written by Frederick Douglas
08 December 2017

Altinex launches the TNP327 and TNP327C Tilt 'N' Plug tabletop interconnect boxes-- available in both standard and custom configurations for mounting into tables, podiums or other furniture as part of a presentation system.

Users can access inputs by pushing down on the top cover, allowing the unit to tilt open. Pressing on the top cover until the latching mechanism engages hides the inputs. In closed position the top panel lies nearly flush with the tabletop, held in place by the latching mechanism.

In stock configuration, the TNP327 offers x2 12Amp grounded AC sockets together with x2 RJ45 network connectors, x2 USB connectors and x2 HDMI pass-through cables. The passive cables are 1.8m long, and are bundled together for organised cable management. The power cable splits to deliver power to both outlets on the tabletop from a single AC plug.

The TNP327 is available now, together with the TNP327C for custom configurations.
