Qbic's product launch at ISE 2018 features the **TD-0350 3.5" Deskbooking Panel PC for hot desking and workspace management** .

It's a whole new era in office workspace, as millennials take over the workplace.

The TD-0350 meets the trend head-on with an aesthetically designed 3.5" touch panel PC for the most modern workspace management.

This chic model features a 3.5" true color LCD tempered glass touch screen with ultra-thin form factor and wireless connectivity, perfect for hot desking applications in the **IWMS** (Integrated Workspace Management System) space.

Thanks to its unique design, the unit can be mounted on any surface, wood, concrete, and glass without damages to the office furniture. The fixtures are tamper-resistant, providing peace of mind for installion in an open public space.

With its own operating system and HTML 5 compatibilty, TD-0350 is not confined by proprietary software: VARs, integrators, and ISVs can integrate their own software along with Qbic's integration process.
