Infocomm 2019 sees the Unified Communications Division of MXL Microphones debut the ACVC-360-Z Zoom Room Bundle-- a package consisting of the AC-360-Z microphone, the CV610 HD PTZ camera and a range of USB cables and mounting cables.

Customers can easily configure the ACVC-360-Z to connect to multiple units. The AC-360-Z microphone has a 12-capsule design (divided into 4 quadrants) for a 360-degree 8m pickup range. Designed for use with Zoom Video Communications, it promises optimal performance and fidelity with crystal clear speech clarity and power via USB-C. It is compatible with any Mac or PC through plug-and-play connectivity, and has a low-profile design with a durable metal finish.

Meanwhile the CV610 is a 5MP camera with a 1/2.8-inch sensor. It handles resolutions up to 1920x1080 for clear and precise images at 30/15/8fps. The lens offers 10x optical zoom and 12x digital zoom, 62.5-degree AOV and 6.5-degree telephoto. The Wide 340-degree horizontal pan with 120-degree vertical tilt provide complete range of motion. Control comes through UVC 1.5, RS232, RS485, USB 2.0 or IR remote with up to 128 location presets for more flexibility.

“With the introduction of the Zoom Room bundle with the AC-360-Z Microphone and CV610 HD PTZ Camera, we are raising the bar and delivering an unrivaled unified communication experience for Zoom Rooms,” MXL says. “We’ve designed an elegant solution for providing maximum coverage right out of the box.”
