

Salamander Design Joins Logitech Collaboration Program

Written by Frederick Douglas
04 July 2019

Salamander Design announces it is now part of the Logitech Collaboration Program (LCP) within the Complementary Solutions track, allowing customers to purchase Logitech collaboration products together with Salamander Mobile Stands, Credenzas and Huddle Tables.

According to the company, users can acquire custom technology furniture seamlessly incorporating Logitech Tap, Meetup and Rally conference cameras, while integrators can offer turnkey bundles promising to be both fast to deploy and matching with customer décor. The result is a combination of technology and design to further unify communications.

“Today’s workplace requires new technologies and systems to support them so people can connect in an instant. These new combined, scalable solutions allow you to be nimble and use exactly what you need when you need it-- regardless of room size or type,” Salamander says. “And Salamander furniture is custom made to specs, yet also quick shipped within days and backed by a lifetime warranty which includes superior service. By selecting Logitech and Salamander as your “go to” enterprise communication solution, your customers can go small, medium, large—even go mobile and global.”
