

Vaddio Ships HuddleSHOT UCC Camera

Written by Alice Marshall
13 September 2019

Vaddio starts shipping the HuddleSHOT-- an all-in-one conferencing camera with integrated audio and an ultra-wide 125-degree field of view the company says is optimised for huddle spaces.

“HuddleSHOT is the ideal camera solution for video collaboration sessions because its 125-degree field of view gets everyone in the picture, even in the smallest areas,” Vaddio says. “In addition, its clear audio quality enhances collaboration on both ends of the call.”

The HuddleSHOT promises plug-and-play simplicity, as well as stereo speakers, two built-in microphones and remote management features. The microphones can pick up participant voices from up to 12m away, while the fixed camera offers 2x digital zoom and 1080p/60 resolution.

Plug-and-play simplicity makes it straightforward to use, and admins get a browser-based interface for easy management of multiple HuddleSHOT cameras across different sites.

The camera is compatible with all major cloud-based conferencing applications, including Zoom, Microsoft Teams, Skype for Business, Cisco WebEx and GoToMeeting.
