

Glasses-free 3D Video Walls

Written by Bob Snyder
20 November 2012

Tridelity presents glasses-free 3D video walls with up to 5760 x 3240 pixels in 3x3 (165") and 2x2 (110") with slim bezel. Alternative models such as 7x1, 3x2 or 3x4 walls are available upon request.

While you can get glasses-free 3D in dimensions of up to 14 feet screen-size and with up to 80 square feet screen surface, Tridelity can also deliver the walls already pre-configured with the hardware needed for 24/7 operation.

Viewing distances of 50 feet or more with custom distances available. Each screen is a Full HD 55" model – already the 2x2 model runs on QUAD-HD resolution

Tridelity offers a bezel of just 0.2" per screen thanks to "ultra narrow bezel" technology.
