Lexmark announces a next generation of mid-range monochrome products-- a single function and MFP series aimed at small and medium-size workgroups promising an "unparalleled combination of reliability, productivity and security."

"This new generation of Lexmark mid-range monochrome products brings the power and durability of a departmental printer or MFP to the desktop," the company says. "The devices include powerful multi-core processors that enable speedy, convenient performance, plus the reliability and security features that customers across the globe expect from Lexmark. In addition, new productivity enhancements help organisations get more done."

The MS and MX 320, 530, 520 and 620 series devices feature sturdy metal construction, as well as long-life components, cartridge yields up to 25000 pages and maximum input capacity of 2300 pages (with optional trays). Printing speed reaches up to 50-pages-per-minute, while the scanner captures up to 100 images per minute, even with mixed originals.

Powering the devices is a multi-core processor with up to 2GB RAM able to simultaneously handle multiple tasks, allowing users to send faxes while printing. A tablet-style e-Task UI provides easy access to solutions such as Scan Center and Shortcut Center, while connectivity covers both standard ethernet and wifi, together with optional interfaces such as serial, parallel and fibre.

The printers can also support a wider range of media types, double-sided scanning means less paper movement in the capture process and font outlining on greys and "new and improved"

printing algorithms ensuring finer print quality. Users can also print from approved mobile devices via Lexmark Mobile Print app, with output via AirPrint, Google Cloud Print, Mopria or Windows Mobile. The MFP has a scan-to-mobile feature allowing scan viewing and sharing on mobile devices.

Environmental requirements are covered through Energy Star 2.0 certification and EPEAT Silver rating.
