Lenovo expands its ThinkCentre business desktop PC line with three "affordable" additions aimed for SMB customers, namely the ThinkCentre E63z, the "Tiny" M53 and the "high value" M79.

The E63z is slim all-in-one PC. It features a 19.5-inch WLED display, integrated VoIP-optimised camera, "high quality" stereo speakers, HDMI-out port, card reader and Rapid Charge USB port. Powering all is Intel Core i3 processors.

Meanwhile the M53 lower-specced version of the "Tiny" M73 and M93p PCs. It includes a remote power up option with a supported keyboard and flexible mounting solutions, as well as the PC Cloud Manager 3.0 system management tool and Intelligent Cooling Engine (ICE) 3.0.

The final ThinkCentre PC is the M79, one featuring the "latest" AMD A-Series APUs for enhanced graphic performance. It comes in small factor and mini tower options able to support up to 3 independent displays via optional 2nd DisplayPort connector.

Being business-aimed PCs all feature Smart USB Protection allowing users and admins to control the usage and access of USB ports, solid state hybrid drive (SSHD) support and energy saving certification including Energy Star 6.0 and EPEAT ratings.
